PROFESSIONAL SUMMARY

Backend engineer with 9+ years shipping SaaS in Ruby on Rails, Go, and PostgreSQL. Currently taking freelance and contract work. Recent engagements in talent-assessment SaaS and digital learning. Previously at Colearn, scaled notifications to 4.5M+ users and shipped web payments and a 6TB recording platform.

CORE SKILLS

Languages & frameworks: Go, Ruby on Rails, Python, React, JavaScript, SQL

Data & messaging: PostgreSQL, MySQL, Redis, Elasticsearch, Neo4j, Kafka, RabbitMQ, SQS/SNS

Cloud: AWS (EC2, Lambda, Fargate, S3, RDS, CloudWatch), Docker, CI/CD

Domains: SaaS, EdTech, talent/HR tech, payments, notifications

AI TOOLING

- Daily engineering with Cursor, Claude, Codex, and OpenRouter for implementation, review, and delivery.
- Multi-model and agentic workflows (OpenRouter, Cursor agents, Claude) to ship and review production code faster.

PROFESSIONAL EXPERIENCE

Freelance Product Engineer · Bengaluru

Sep 2022 – Present

Talent-assessment platform (contract)

- Engineered features on an enterprise assessment SaaS (Rails, React, PostgreSQL) for campaigns, psychometrics, and reporting.
- Shipped Individual Development Plan workflows: skills (private vs global), manager views, PDF reports, and approval/rejection emails.
- Delivered RTL/Arabic localization, project feature flags, and third-party assessment-publisher integrations.

Digital reading product

- Built backend and product features for personalized lessons, placement assessments, and progress monitoring.

Senior Software Engineer · Colearn · Bengaluru

Apr 2021 – Aug 2022

- Architected a notification platform that delivered real-time alerts to 4.5M+ users via Kafka and queue-based systems.
- Built a recording-management service to migrate and store ~6TB of class recordings, cutting storage cost and improving retrieval for audits/QA.
- Shipped web payments with packages, coupons, and payment-gateway integration.

Senior Software Engineer · Finly · Bengaluru

Sep 2020 – Apr 2021

- Revamped accounts-payable and vendor-management workflows on a financial-ops SaaS as part of a rebuild that retained 85%+ of existing customers.

Software Engineer to Team Lead · Synup · Bengaluru

Jan 2019 – Sep 2020

- Promoted to Team Lead; owned billing, notifications, and review campaigns for a SaaS serving 160,000+ businesses.
- Designed Neo4j-based role and permission management for enterprise customers.
- Shipped listing integrations for Siri, Cortana, and Google Assistant.

Software Engineer · Cybrilla Technologies · Bengaluru

Oct 2017 – Dec 2018

- Built and maintained payroll software used by 400+ production customers on Ruby on Rails and PostgreSQL.

Software Engineer • Fueblabs Automations • Bengaluru

Sep 2016 – Oct 2017

- Developed a real-time ride-hailing app with WebSocket notifications (Rails, ActionCable).
 - Built backend CRM for India's first air ambulance service, coordinating 6,000+ ambulances and 1,000+ hospitals.
-
